

A monitored burglar & smoke detector.

Your home or business is protected 24 hours a day, 7 days a week.

Peace of mind you will have knowing that when you are away, your family members and your cherished possessions are shielded from robbery.

You will have full use of three panic buttons (police, medical, and fire) located on the keypad. The system has a silent forced alarm code feature. You can use this option if you are ever worried about an intruder.

You will be contacted at work or on your cellphone.

The police, fire department, or medical units will be immediately notified.

Other devices that can be monitored are:

1. A medical alert for your elderly loved ones.
2. Carbon monoxide, panic buttons, window contacts, glass break monitors, and high temperature detectors for the kitchen.
3. You can have special motion detectors if you have pets.

It takes about 3-6 hours to install a security system, depending upon the size of the house.

If you have a business with closed circuit television cameras (CCTV), you have a recorded event that you can use for prosecution in court. You can also monitor your business at home via the internet. If there is a power failure, the alarm system has a 6-hour battery back up.

There are 3 levels of protection ranging in price from 500, 1000, and \$1,500.
